

LAB WORKSHEET

Lab 19 — Physical and Environmental Security Walk-Through

Name		Date	
------	-------------	------	-------------

Objective: 3.2 — Physical security: access controls, locks, mantraps, environmental controls.

Work through the lab on the Killercoda Ubuntu playground and record your results below.

Task 1 — Sensor read

Run sensors / smartctl for environmental readings.

Record any temperature reported (or note VM has none).

Task 2 — Access layers

List the defence-in-depth layers outside-in.

Name each layer and its control.

Task 3 — Locks

Compare the four lock types for replay resistance.

State which are clonable and the best-practice combo.

Task 4 — Environmental

State the ASHRAE range and the fire-suppression type.

Record the temp/humidity range and the gas.

Task 5 — Audit checklist

Complete the physical-security checklist.

Mark five items and note any gap found.

Completion checklist

- Read (or accounted for) environmental sensors.
- Described the outside-in access-control layers.
- Compared lock types and two-factor access.
- Stated ASHRAE targets and fire-suppression type.
- Completed the physical-security audit checklist.
