

LAB WORKSHEET

Lab 20 — Identity & Access Management for Server Administration

Name		Date	
------	-------------	------	-------------

Objective: 3.3 — IAM: accounts, groups, password policy, RBAC/rule-based/scope-based, auditing, SSO.
Work through the lab on the Killercoda Ubuntu playground and record your results below.

Task 1 — RBAC + SoD

Create the three groups and users.
Paste id for alice, bob and carol.

Task 2 — Delegation

Install the sudoers fragments and test bob/carol.
Record the ok/denied results.

Task 3 — Password policy

Set pwquality, faillock and chage.
Paste chage -l alice.

Task 4 — Permissions

Apply group bits and an ACL to /srv/dbdata.
Paste getfacl /srv/dbdata.

Task 5 — Audit targets

Query the four audit targets.

Note one result per target.

Completion checklist

- Built RBAC groups with segregation of duties.
- Delegated via role- and rule-based sudoers.
- Enforced password length, lockout and age.
- Layered group and ACL permissions.
- Queried the four audit targets.
