

LAB WORKSHEET

Lab 28 — Troubleshooting Methodology Walk-Through

Name		Date	
------	-------------	------	-------------

Objective: 4.1 — Troubleshooting theory and methodology.

Work through the lab on the Killercoda Ubuntu playground and record your results below.

Task 1 — Manufacture fault

Break nginx by changing listen to 22 and restart.

Record the systemctl is-active result.

Task 2 — Identify + backup

Gather logs and back up the config.

Paste the emerg bind() error and the backup filename.

Task 3 — Theory + test

Prove the port-22 conflict.

Paste ss -tlnp 'sport = :22'.

Task 4 — Fix + verify

Revert to 80 and verify HTTP 200.

Paste curl -sI head line and is-active.

Task 5 — RCA + document

Complete the 5-whys and incident record.

Write the root cause and two action items.

Completion checklist

- Manufactured a reproducible fault.
- Backed up before making changes.
- Proved the theory with a single command.
- Applied one change and verified full functionality.
- Completed an RCA and documented the incident.
